(From Jim Gordon)

5/24/83

Dear John,

An ancient call rides the winds this day calling man's soul homeward. This ancient call is one that has radiated through the universe since the Creator sent forth his Divine Presence in Creation. The call is the call to the Divine Spark to awaken and eventually return to its source.

This is the call you respond to when you are searching for ways to help humanity out of its darkness and enter more into light and understanding. It is this same call each of you in the group respond to that draws you together again in service.

This call has been called many things by many philosophers. Magnetic attraction, mind force, universal attachment, universal bond, life substance, life force, the call of God, the unspoken word, and many other titles has man given it. I choose to call it Love; God's Love for Man! God's love for himself actually, for that Divine spark within us, is the Divine spark of God so truly in the real sense it is God's love for self that is the call of the universe.

And so it is when we reach out to fill that void within us, or reach out to be of service to humanity, or when we reach out in prayer and meditation to find understandings of universal mysteries, we are responding to this call.

Each person responds differently and at times, most of the time, this call is misinterpreted and man goes through life trying to answer the call by searching out for money, or physical love, or power over others and so forth. Few realize what the call truly is and respond to it.

To those that do respond to this call with some understanding comes a challenge which must be met on several levels of man's being. Such is the challenge you all have placed before each of you, for as you respond to this call the challenges are placed before you. These challenges are different and yet somewhat the same for each of you.

Different, because each of you have your own karma to deal with, and because the individual karmas are multi-faceted and multi-different from one individual to another, so too are your challenges different when you respond to the "Call on

the Winds."

At the same time, you will find your challenges similar and sometimes the same because each of you are interlinked karmically as a group, both in karma owed each other as well as past service to God and the call that has created a bond of group spiritual development and service in response to this call.

Thus you see more clearly what is taking place in your life as you look around, and you better understand the bond of love that draws you together and that motivates you to strive to serve as a team.

This for some of you is a great challenge, for in group effort some of self must be released or at least set aside for a time, and for some this is very hard, but it is important to group development and also to individual development with the group. This allows the leadership quality of each to come forth and grow, where if one or two of you play the dominant role, you will find it suppresses individual growth and development within the group, thus suppressing fulfillment of group purpose. For others the challenge of response, is to step forward and express yourself and your ideas, rather than sitting back and letting others do for you. Express your ideas and challenge the ideas of others so that you can best find that inner quality of leadership within yourself. And it is important to others to listen and respond when one attempts to open to this leadership quality, helping the person to truly find understanding and a true sense of expression of the inner self, thru service.

It is important that the individual be aware of self growth and inner awareness as well as group growth and group awareness. The Masters hope to some day create or should it be said bring together a group of Light Servers who can best reflect the inner quality to humanity to serve as an inspiration and as a service of education to the masses. Just as they, the Masters on the inner planes unite and work for common goals so too they hope to eventually groom a group of individuals to serve in that capacity here on the physical. This is why lifetime after lifetime groups are drawn together and, forced in some instances, to work together

for common goals and common growth.

The challenge is at this time to learn to grow and harmonize the group energies so that the group can truly be of service and not just one or two of the group.

Michael - Overseer of the Inner Call ---

### Cato and Jesus to the Foundation

Beloved children, I Cato come to you once again to manifest this truth that you have called forth. I have been commissioned to bring to you not only the point of view of the hierarchy but that of the Masters of Inner Light as well. The view of the hierarchy is that you should become instruments of the Divine.

I say unto you that wisdom and truth is there before you each day within your hearts, and within your minds. It is up to each of you to first go forth, to go within and find that peace, that light and that truth that leads you ultimately to the love of God within and it is that love that manifests forth that gives you all the wisdom and understanding of that wisdom so that you can go forth and manifest, create, become and do the will of God.

We seek, we knock and we ask and all things are given unto us. But first you must seek, you must knock and you must ask that the keys to the kingdom can be given to you. You must go within, you must search and you will find.

As for the work of the foundation, it is progressing even though slowly, it is progressing. At times you may look upon the situations around you within the foundation and wonder, and think to yourselves that truly the foundation is nothing more than a figment of someone's imagination or a toy. But truly the figment of the imagination that is the foundation in your mind, is a reality in ours. Seeking to find expression in the physical world through each of you, and a toy that you might see the foundation become an instrument of service for spirit and for humanity. It takes each of your energies here present to go forth and manifest that light, and it takes each and everyone in the group effort to bring forth the birth of an idea, to bring it into reality, to manifest it as a truth, to give it life, to give it love and support.

The foundation has gone through its birthing pains and has come out a healthy child, and now it must take that child and raise it up as a man, as a true spirit of God in service of the Divine and service to humanity. Whatever

ailments appear to be in that child are ailments that man tries to put upon it. The child is pure, the child is the divine essence of love that is God within. If man himself and society itself places ailments and ideals upon that child to keep it from maturing and growing as it should and we seek to tell you now -- let not those ailments manifest but rather heal the child, make it whole and give it light.

There is a great service to be done within the foundation work and it is up to each of you to go forth individually and as a group to find a way that the foundation can begin its service no matter what level of service it might be, whether small or large, whether important or not important in the overall effects of man, it must begin its work. It must begin to manifest its truth and to grow in its reality. If it lays dormant too long, the child shall die through starvation. That starvation is the lack of interest and the lack of activity that can give it life or death. It is only through the beating of the heart and the flowing of the blood within the body of man, the body maintains its life and it is the spirit that ensouls the body that keeps the heart beating and the blood flowing and the body alive. You are the souls of the foundation, you give the life unto the foundation body. Keep that heart beating and you keep the blood flowing as long as you give support and give life unto the heart system.

So we of the Masters of the Inner Light call upon you to focus your attention daily upon the foundation principles, daily upon the call to be of service that the heart may keep beating and the blood may keep flowing so that the child may keep growing to maturity of service. This is the call today. This is the desire of the Inner Masters. We call out to you to manifest that truth, to focus your attention and your love, and to give a new life, a new purpose, a new service to your life and to the foundation's life.

At this time I call upon the Elder Brother, Jesus, who wishes to impart to you a certain wisdom, a certain teaching...

As the Elder Brother, I come unto thee at this time not to impart so much a great teaching of the Inner Light but to give an understanding of those things around you at this time.

I came and walked upon the planet earth many times in many bodies in order to be of service. You have come and walked the planet earth in many times in many bodies. You have sought to be of service and you have asked to be opened up so that you can better serve. We try to bring unto you the clarity that is needed for success and for understanding of which direction to go, but it is up to each of you as individuals and as a group to find the clarity and to find the answers as to the direction you as souls and as a foundation wish to take -- whether it be through education, or through healing, or through research. That is not so much as the fact that the foundation is present in the physical manifesting the light and the God in bringing forth the truth that is needed upon the physical planes of earth at this time to manifest balance, understanding and harmony.

It is up to you to find the direction, the path of service in the physical world for this foundation. We will work with any direction you so choose and we will draw to you those individuals who can best serve in the direction you have chosen to take, but take a stand. Choose a direction and follow through to completion those ideas and know that we stand with you every step to success.

I wish that I could offer to you an answer, an answer to what to do and how to do it, but my children I cannot. We give direction in the sense of inspiration. We give direction in ways of motivation. We give direction but we leave it in your hands to fulfill according to your own soul development and capabilities.

We want you to become spiritual beings living spiritual lives, conducting spiritual principles and manifesting the spiritual life as individuals, as a group and as a foundation. In order for this to be done each of you must make

an endeavor to find the God within and to manifest it. Each of you must find a point of reference of light that you can express to humanity as truth and love that is the Divine. This is the divine adventure, the adventure that you chose to take upon yourselves so many eons ago when you began incarnation. The divine adventure with man and this is the adventure that is offered to you at this time to fulfill that manifestation and bring it into fulfillment as spirit. Know that my spirit and my love is ever with you and that whatever path you as an individual and you as a foundation choose, my spirit is with you as long as you call me to be there. I will ensoul the spirit of the foundation with my life, and with my love, and I will offer it unto humanity in whatever way you so choose that the manifestation of the foundation shall take.

My beloved, I have now spoken. Open your hearts and find purses, purses of silver as well as ideals for when was it said that either was denied to you. I give you both and I give you love. Know that my love is ever present and leaving you at this time, I know that I shall return. Peace and love and regeneration of spirit come to you in your walks and talks with one another. This is my message that the work calls ever forward for your presence and your service.

I speak as one having authority, knowledge and power to transcend all natural law and make flowers out of thistles. Peace my brothers until next time.

#### From Masters of Inner Light

As you can see through the writing and the flow that this energy is different from other communications in the past. This is because we have never attempted to contact you at anytime until today. We are the collective consciousness of a group of Inner Masters who work privately with the mass consciousness of Man. We have separated ourselves from the flow of the Father's energy dealing with hierarchy and the Lords of Karma so that we are not involved or distracted by events of the development or response to the flow as it exists today for humanity.

Instead, what we have been doing and will continue to do is to try to influence the outermost layers of the mental universe as it relates to earth's humanity and try to mold solid understanding and clear pictures of truth which might filter down in time and affect the flow of and the pattern of man's conscious development. In this way we are attempting to influence man's relationship with himself, his universe, and his God so that man's evolution might be further progressed than it is destined at this time.

This is where you and the foundation goals play a role in this flow as well. If you are to help humanity with the work you project through the foundation's efforts, you must realize you can be a reflection of what we are doing here in the higher reality. Just as we are ever influencing and creating on these higher levels of the mental universe, so too, you and the foundation can influence and create with the mental universe of those individuals that you and the foundation work with and aid. In time research, classroom, doctor's office and home life can then begin to reflect more the higher ideals of what is being sent forth; for through the foundation's work you can help and teach people to open and respond to these higher ideals. In this way these wisdoms and these images can be better focused and manifested on the physical plane and better influence the individual mental realms of man.

As time progresses, you will begin to see our influence and understand better that which is being stated today. For we are now seeing a few of you begin to respond to this higher ideal and with this the influence of the higher principle which we have set forth might better be presented for mankind in time.

As we have set forth ideas on the higher to act as magnets to draw upward the consciousness of those who will respond, so too you must learn to set forth ideas to act as magnets to draw into involvement those who can best serve and aid mankind.

Again, the Law of Discrimination must be fully manifested here, and learn

to discern the flow and direction of those who are or who wish to be involved.

We of the Inner Light group work free from all other relationships dealing with Earth Karma and humanity development. In this detached manner we are better able to visualize and project a clear image of what the True Creator has projected for his creation. If we were involved with hierarchial projects and with balancing the scales of karma as the Lords of Karma are, we would soon lose sight of the true projection of perfection, which we are dealing with at this time.

Why we are even the most slightly interested in your endeavor and why we are communicating to you in this manner, is so that you are aware of our goals, at least to some extent, and so too, the goals of your foundation might be made more clear and project a more clear understanding to humanity.

Through the educational facility that you are considering setting up, it is hoped in time that you will be able to work with the consciousness of the students to help mold and create a more perfectly clear picture of life, physical and spiritual. In this way you will help humanity respond more to the images and energy flow we are setting up on the higher mental planes.

Until the late 1400's mankind was mainly an emotional nature being using little of his true mental faculty. Due to this most of our work has been conducted silently from the higher planes, hoping and knowing in time mankind would reach a point in his development where the mental nature would begin to play more of a role in his life and development. It was in the last 1400's that the mental seed atom was once again reawakened in man and the mental nature began to play more of a role in his daily life.

This new period of development was introduced to humanity by great souls who incarnated and attempted to set up a pattern of mental inquiry, that would instill in humanity a desire for more mental function and balance between the emotional and mental nature.

Thus you see great souls such as Leonardo da Vinci, Copernicus, the

Christian family, Galileo and other such great mental giants introducing this New Age to man.

Now as you look around you today you see before you the creations of man's mental aptitude and can truly see that humanity has moved forward from the animal, emotional being of a few hundred years ago into more of a conscious being, capable of creating with his mind and then his hands. Also man has learned to understand his emotional nature and has learned to use the emotions to a constructive end, where before they really served man many times, more for his destruction.

What we have been attempting to do and continue to do, is to set forth clear mental images that we hope will become humanity's goals and humanity's realization as it evolves.

What we hope, is that the foundation can help people to see and achieve these mental images, for their further growth and for the further growth of all mankind.

Change the process of man's development and free him from having to be involved so much with the evolutionary process. We wish to give him yet a different picture, a different idea that he is not bound to this world for eternity in evolutionary progression towards his spiritual reality; but rather he may free himself and liberate himself from this bondage if only he will capture the picture of perfection that he is and lose sight of the imperfection that has been taught to him. This can be done through several channels. One channel will be we trust through the educational means, of upgrading education so that man will begin to be more and more a mental being and mental service to his reality and in this way we hope to give a mental picture of this spiritual perfection.

You can see clearly that in the last few hundred years man has become more a mental being and expressed more his mental nature than he has in several thousand years, and it is because man once again has begun this path up toward the

Divine nature. As your solar system at this time is moving back inward to the great central creation sun of this universe, so too man's mind is moving ever closer to the central core of his creative universe.

And so what is being attempted is to raise man's consciousness once again as he enters into this new level of awareness to raise it ever higher, ever more quickly so that perfection can be achieved. Through education it can be done. But first we must educate the teachers, we must bring them into awareness; we must bring the whole concept of education into a new awareness and this is being done by so many different channels today.

Another area that is going to be very beneficial for our purpose is the development of certain electronic equipment that can free man of his physical karma and his illness. We are striving to bring about in the awareness of certain individual devices that can actually change the karmic pattern of man and free him from ailments by changing the vibrational pattern in man's consciousness in man's aura. You cannot heal a man who has karma to deal with if that karmic picture creates an ailment in that man's karmic picture that has not been completely lived out. That ailment will exist until that picture is dissolved. That picture can be dissolved either by living the karmic pattern out to its fullest, or by changing man's vibration to a higher level, a higher awareness and then bringing about a healing of that karma, and a perfection and a healing of the physical world of that being, that man.

This is that we want to do with the equipment that we seek to be developed today is a changing, upgrading of the vibration of man's own existence. Just as you are now seeing that there is an upgrading of the equipment and communicating with the lower astral so that someday through that equipment there might be a change in frequencies so you can communicate with higher beings and not have to deal so much with the lower. Too, you must see that there must be equipment that will change the vibration of man's own being from being involved in the

lower and upgrade him and bring him into the higher. This is our goal, this is our motivation -- to begin dealing more and projecting more into the physical world.

We feel that you can do a great amount of good in the development of this equipment that can bring about a change in the vibration of man's being. Focus upon the mental vibration of man and focus upon changing the frequencies within man's own being, changing them in subtle ways that you are changing into a higher vibration so that man will see more clearly. Sir Arthur Conan Doyle, whom we worked with at one time, tried to develop the equipment that would bring about this type of change. Unfortunately, the picture was not clear to those dealing in this and the electric shock was developed instead. Recapture the picture of change in the frequencies of man's being and develop toward that.

From Michael - The Overseer of the Inner Call

An ancient call rides the winds this day calling man's soul homeward. This ancient call is one that has radiated through the universe since the Creator sent forth His Divine Presence in creation. The call is the call to the Divine spark to awaken and eventually return to its source.

This is the call you respond to when you are searching for ways to help humanity out of its darkness and enter more into light and understanding. It is this same call each of you in the group respond to that draws you together again in service.

This call has been called many things by many philosophers. Magnetic attraction, mind force, universal attachment, universal bond, life substance, life force, the Call of God, the unspoken word, and many other titles has man given it. I choose to call it Love; God's love for man! God's love for himself actually, for that Divine spark within us, is the Divine spark of God so truly in the real sense it is God's love for self that is the call of the universe.

And so it is when we reach out to fill that void within us, or reach out to be of service to humanity, or when we reach out in prayer and meditation to find understandings of universal mysteries, we are responding to this call.

Each person responds differently and at times, most of the time, this call is misinterpreted and man goes through life trying to answer the call by searching out for money, or physical love, or power over others, and so forth. Few realize what the call truly is and respond to it.

To those that do respond to this call with some understanding comes a challenge which must be met on several levels of man's being. Such is the challenge you all have placed before each of you, for as you respond to this call the challenges are placed before you. Some of these challenges are different and yet somewhat the same for each of you.

Different, because each of you have your own karma to deal with, and because the individual karmas are multi-faceted and multi-different from one individual to another, so too are your challenges different when you respond to the "Call on the Winds."

At the same time, you will find your challenges similar and sometimes the same because each of you are interlinked karmically as a group, both in karma owed each other as well as past service to God and the call that has created a bond of group spiritual development and service in response to this call.

Thus you see more clearly what is taking place in your life as you look around, and you better understand the bond of love that draws you together and that motivates you to strive to serve as a team.

This for some of you is a great challenge, for in group effort some of self must be released or at least set aside for a time, and for some this is very hard, but it is important to group development and also to individual development with the group. This allows the leadership quality of each to come forth and grow, where if one or two of you play the dominant role, you will find it

suppresses individual growth and development within the group, thus suppressing fulfillment of group purpose. For others the challenge of response, is to step forward and express yourself and your ideas, rather than sitting back and letting others do for you. Express your ideas and challenge the ideas of others so that you can best find that inner quality of leadership within yourself. And it is important to others to listen and respond when one attempts to open to this leadership quality, helping the person to truly find understanding and a true sense of expression of the inner self, through service.

It is important that the individual be aware of self growth and inner awareness as well as group growth and group awareness. The Masters hope to some day create or should it be said, bring together a group of Light Servers who can best reflect the inner quality to humanity to serve as an inspiration and as a service of education to the masses. Just as they, the Masters on the inner planes unite and work for common goals, so too they hope to eventually groom a group of individuals to serve in that capacity here on the physical. This is why lifetime after lifetime groups are drawn together and, forced in some instances, to work together for common goals and common growth.

The challenge is at this time to learn to grow and harmonize the group energies so that the group can truly be of service and not just one or two of the group.
